BEFORE

AFTER

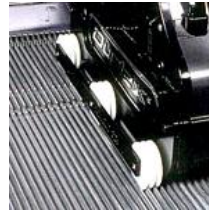

The Duplex Escalator Cleaner is a version of the robust Duplex Floor Scrubber that has been modified to be a stationary escalator cleaner. It combines sweeping and scrubbing to attain new standards of escalator cleaning, with extra long brushes and a patented auto guide system keeps machine perfectly aliquot on all types of escalator.

Conventional escalator cleaning techniques have required the entire escalator to be dismantled and each step cleaned manually. The Duplex Escalator cleaner takes just 45 minutes to sweep and scrub the escalator without the need to dismantle.

Stationary Position

The Duplex Escalator cleaner is placed at the bottom of the escalator and is locked in a stationary position. This requires no lifting up and down the escalator for maximum cleaning with minimum effort

Guide rail system

The patented guide rail system on the Duplex Escalator cleaner keeps the machine locked to the path of the escalator. The guide system eliminates side swaying of the cleaner ensuring a consistent clean.

Extra long brushes

The extra long brushes on the Duplex Escalator cleaner have been designed in consultation with major escalator manufacturers to penetrate to the lower profile of the escalator floor.

Vacuum attachment

The dust is swept from the escalator tread by the Duplex Escalator cleaner in dry mode and removed with any vacuum attached via the integral connector

Technical Specifications

		Base 350	Base 550	Pro 350	Combi 550
Brush length	cm	35	55	35	55
