

VYNAGRIP

Heavy Duty Grid Matting

Designed to withstand all kinds of liquids, **Envon VYNAGRIP** provides a superior defence against slippery environments. The mat's diamond tread pattern delivers unparalleled traction underfoot, which not only helps to reduce the risk of people slipping but also helps to prevent equipment from skidding.

Made from non-porous PVC with a two-layer grid construction, this heavy-duty plastic matting features an open grid for excellent drainage, is impermeable to fluids, and can withstand low temperatures without cracking or curling. This winning combination makes Vynagrip the ideal refrigerator floor mat, walk-in freezer floor mat, or slip-resistant mat in any workplace where spillages are likely, including commercial food service areas and industrial environments.

Vynagrip's non-porous construction also resists bacteria growth and mildew, providing the highest level of hygiene. It's also perfect for workplaces with standing employees: the two-layer construction provides comfortable cushioning and anti-fatigue properties proven to help boost productivity.

Features & Benefits:

- Diamond cut pattern
- Two layer open-grid construction
- Made from non-porous PVC
- Proven anti-fatigue properties
- Certified slip resistant (DIN 51130: R11, ASTM 1677: 1.0/0.9)
- Excellent drainage (DIN 51130: V10)
- Chemical, oil and acid resistant
- Boosts productivity
- Contours to uneven surfaces
