KLEANWAY

G-Cloth

The Ultimate Microfiber Cleaning Cloth

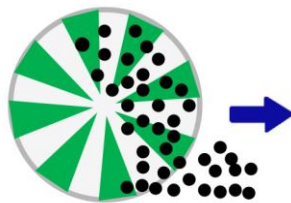

With more tiny fibers, **Kleanway G-Cloth** is an ultimate microfibre cloth for removing dirt and finger prints from windows, mirrors or stainless steel surfaces. Lint-free and streak-free cleaning without chemicals.

Why Use Microfiber?

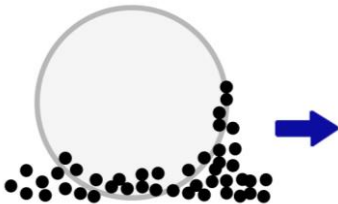

- It saves money and outlasts normal cleaning cloths.
- It is environmentally friendly as it cleans effectively with water and no chemicals is required.

How is Microfiber Cloth Better?

MICROFIBER

More dirt and water are trapped within the tiny fibers leaving surfaces cleaner and drier.

NORMAL FIBER

Particles and moisture are held on its surface with minimal pick up, leaving and spreading residue around.

How to Care for your Microfiber Cloth

- Rinse it thoroughly with water after each use to prevent residue from gumming up the fibers.
- If necessary, wash it with warm/hot water and a mild detergent, rinse it thoroughly and air dry.

G-Cloths are available in different colours to prevent cross contamination for jobs and locations. This colour coding system increases hygiene and reduces potential risks of spreading diseases.
