

Vileda r-MicronGlass Cloth

Leading with LESS -The new recycled durable wipes

r-MicronGlass with superior cleaning results is made from 70% recycled post-consumer plastics – like PET-bottles. Due to advanced microfibre performance, **r-MicronGlass** delivers an excellent streak free cleaning result. Its ability to remove up to 99.99% of bacteria and viruses makes the recycled wipe especially suitable for hygiene sensitive areas like hospitals, patient rooms or canteens.

The large surface area of the wipe allows rapid and more effective cleaning than regular sized wipes. Every surface such as stainless steel, plastic or ceramic can be cleaned in one wipe with lint-free cleaning results. This multi-use wipe is specifically designed for daily laundering and can be reused multiple times.
