

Vileda r-MicronQuick Cloth

Leading with LESS - The new recycled durable wipes

Sustainability • Every Effort Counts

r-MicronQuick, a durable and washable cleaning cloth made from 70% recycled microfibres, contributes to a sustainable future while achieving superior cleaning performance even in microscopic structures, removing up to 99.99% of viruses and bacteria with just water. Due to this, the **r-MicronQuick** is ideal for healthcare, food manufacturing and areas, where high level of cleanliness and hygiene are required. The four colour coding system allows a differentiation of the cloth, which reduces the risk of potential cross-contaminations.

Features:

- ✓ Removal of 99.99% of bacteria and viruses – certified by independent test institute.
- ✓ Rapid and efficient cleaning due to advanced microfibre cleaning performance
- ✓ Reusable & high washing resistance: min. 400 washes
- ✓ High absorbency & streak free cleaning
- ✓ Made from 70% recycled PES
