# KLEANWAY

## M-Cloth

### The Ultimate Microfiber Cleaning Cloth

With more tiny fibers, **Kleanway M-Cloth** is super absorbent and is able to trap dirt, grime and water within, making it perfect for cleaning all types of surfaces.

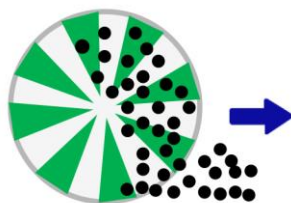

#### Why Use Microfiber?

- It saves money and outlasts normal cleaning cloths.
- It is environmentally friendly as it cleans effectively with water and no chemicals is required.

#### How to Care for your Microfiber Cloth

- Rinse it thoroughly with water after each use to prevent residue from gumming up the fibers.
- If necessary, wash it with warm/hot water and a mild detergent, rinse it thoroughly and air dry.

### How is Microfiber Cloth Better?

**MICROFIBER**

More dirt and water are trapped within the tiny fibers leaving surfaces cleaner and drier.

**NORMAL FIBER**

Particles and moisture are held on its surface with minimal pick up, leaving and spreading residue around.

M-Cloths are available in different colours to prevent cross contamination for jobs and locations. This colour coding system increases hygiene and reduces potential risks of spreading diseases.

#### TECHNICAL SPECIFICATIONS

Colour:	Blue Green Red Yellow
Packing:	10pcs per pack
Sizes:	30 x 30cm 40 x 40cm
